

THE STORM WATCH PROGRAM

Free lifetime roof monitoring — no cost, no obligation.

The Storm Watch Program is Titan BRB's free, lifetime roof-monitoring service for churches and their facilities. We document your roof's current condition and then continuously watch your property's location for hail and damaging wind. If a qualifying storm strikes, we notify your office and return for a free re-inspection — so any new damage is caught early and documented for your insurer while it is still fresh.

What the program provides

- ✓ Free, lifetime monitoring of your church's exact location for hail and severe wind events.
- ✓ If a qualifying storm hits, Titan BRB notifies your office and provides a free re-inspection.
- ✓ Your roof's baseline condition is on file, so new storm damage is easy to identify and prove.
- ✓ We can work directly with your carrier (Catholic Mutual, Church Mutual, GuideOne, Brotherhood, and others).
- ✓ No cost and no obligation — enrollment never commits the church to any repairs or contract.

How it works

- 1 Baseline inspection.** We inspect and photograph your roof at no charge and record its current condition.
- 2 Continuous monitoring.** We track your exact address against every reported hail and severe-wind event.
- 3 Free re-inspection.** When a qualifying storm strikes, we return, inspect, and document any new damage — free.

To enroll your church, or to schedule a courtesy roof review, contact Patrick John.
